## Project Design Phase-I Proposed Solution Template

| Date          | 14 October 2022                               |
|---------------|---|
| Team ID       | PNT2022TMID37794                              |
| Project Name  | Real- Time River Water Quality Monitoring and |
|               | Control System                                |
| Maximum Marks | 2 Marks                                       |

## **Proposed Solution Template:**

Project team shall fill the following information in proposed solution template.

| S.No. | Parameter                                | Description  |
|-------|--|--|
| 1.    | Problem Statement (Problem to be solved) | Massive growth of algae called eutrophication leads to pollution(monitoring and controlling the quality of river water)                                      |
| 2.    | Idea / Solution description              | Detecting the dust particles, PH level of water, Dissolved oxygen and temperature to be monitored and altering the authorities if water quality is not good. |
| 3.    | Novelty / Uniqueness                     | River water quality can be monitored by web application.  Quality parameter will track continuously with standard measurements.                              |
| 4.    | Social Impact / Customer Satisfaction    | Localities will not get suffered by poor quality of water by alerting them when the water quality is not good.   |
| 5.    | Business Model (Revenue Model)           | Water quality monitoring system by aeron systems for industrial water treatment plant, river bodies, aqua forming ,digital loggers.                          |
| 6.    | Scalability of the Solution              | Measuring of real time values and continuous monitoring helps in maintaining the quality of water.   |
